Microcharts

Microcharts/Microcharts.Forms

github.com/dotnet-ad/Microcharts

Drawing basics

Shapes

- `clear()`
- `drawCircle(x: 50,y: 25, r: 25)`
- `drawRect(l: 0, t: 50, r: 100, b: 100)`
- `drawPath(PATH)`

- moveTo(0,0)
 - lineTo(100,0)
 - lineTo(100, 200)
 - lineTo(50, 200)
 - arcTo(0, 150)
 - lineTo(0,0)
 - drawPath(PATH)
- A blue bracket on the right side of the list groups the first six items under the label "PATH".

0,0

Canvas

width,height
100, 200

Utilizing vector images

- `path = fromSvg(„{SVG_DATA}“)`
- `path.Add(fromSvg(„{SVG_DATA}“))`
- `drawPath(path)`

Animation

- `clear()`
- `drawCircle(x: 50,y: 25, r: 25)`
- `Time(n) = 0 ... l`
 - `clear()`
 - `drawCircle(x: 50,y: 25 + 150*n, r: 25)`

0,0

Canvas

width,height
100, 200

Rendering

- Stroke
- Fill
- AntiAlias
- Matrix Transform
- Clipping
- Effects

Usage in *Xamarin*

Xamarin.Forms Shapes

- 2D drawing API
- Preview API in Xamarin.Forms – Release in 5.0
- Supported on iOS, Android, macOS, UWP, WPF
- Uses native drawing API
- High level abstraction

Xamarin.Forms Shapes Features

- Views: Shapes and Geometries
- Ellipse, Polygon, Polyline, Line, Rectangle, Path
- XAML and C#
- FillRules, Aspects, Masks

Xamarin.Forms Shapes Sample

SkiaSharp

- 2D drawing library
- Bindings, Views and Abstractions of Skia Graphics Library
- Supports ... everything ?! (.NET Core/.NET Standard/Xamarin. Android/iOS/tvOS/watchOS/Mac/Forms, WPF, UWP, WebAssembly, Tizen, GTK, UNO)
- Active development by Microsoft

SkiaSharp Features

- Unified API across platforms
- Touch support
- SVG
- Rich geometric functions
- Clipping, Masks, Effects, Shader, Blending, Caching
- Different rendering backends

SkiaSharp Sample

- Touch input
- Dynamically sizeable
- Cool thumb

Which should I use?

Xamarin.Forms Shapes

- + Build-in
- + Simple API
- + Bindable
- Only Xamarin.Forms
- Layered views
- Feature set

SkiaSharp

- + Feature set
- + Compatability
- + Performance
- Large (4-6mb)
- Complexity

Q&A
